Unity / HoloLens / Mixed Reality Developer

Combine reality with the new possibilities of mixed reality and develop applications for healthcare and service business

What we offer you:

- Learn new technologies and become a professional expert
- Exciting healthcare and industry projects
- International team, nice colleagues, flat hierarchies

Your responsibilities:

- Development and testing of Unity/C# application for HoloLens
- Knowledge sharing with teammates
- Preparing software documentation

This job is for you if:

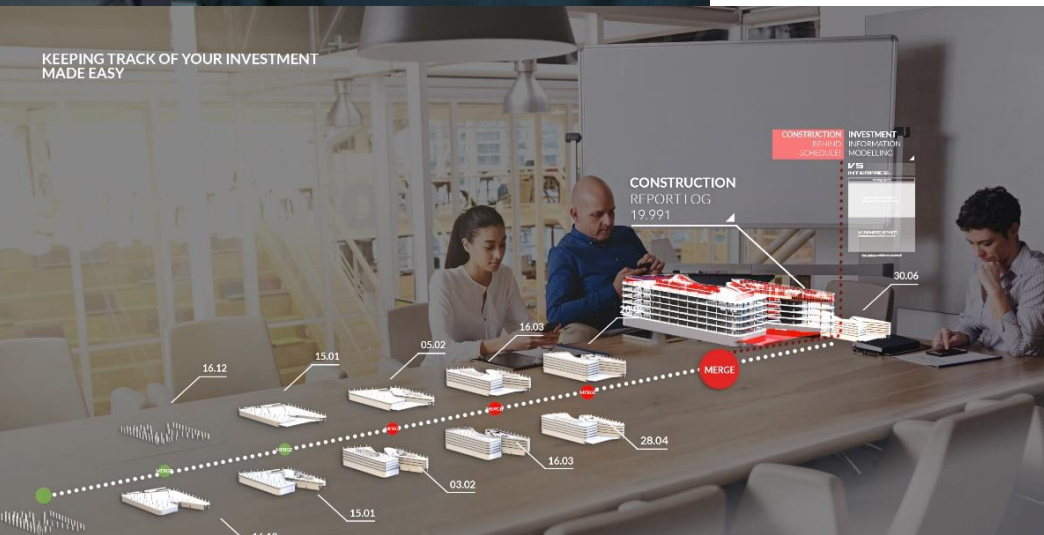

- You have 2 years of experience in C# or you have 1 year of experience in a commercial Unity project (a released application)
- You're interested in VR/AR topics
- You're good at teamwork
- You can freely communicate in English

Nice to have:

- Experience in AR/VR projects
- Knowledge of DirectX, OpenGL, Microsoft Azure and Cognitive Services, Machine Learning and image recognition

Interested? Apply!
